ABOUT ME

An Experienced Full-Stack Developer with six years of experience in designing, developing and implementing applications and solutions using range of technologies. Always keen to learn new technologies, Following best Quality Practices by applying Design Patterns, on-time Delivery, and looking to take more leadership over project delivery.

WORK EXPERIENCES

Full Stack Engineer

June, 2019 - present

Adobe Systems

- Worked on building executive focused Adobe analytics dashboards for Adobe's top digital marketing clients.
- Worked on developing custom web applications end to end to solve various customer needs.
- Designed and Developed an Automation Framework that automates the processing of onboarding a client to Adobe Analytics, Launch and Target for a Customer Website. This Framework reduced the Consultant Efforts significantly by 90% and Is now used widely across the teams.
- Worked with tight deadlines, and small consulting budgets to complete major tasks.

Server Side: **Node.js, Express.js, Java, Docker, AWS**, GraphQL

Client Side: **ReactJS**, Javascript, HTML, CSS

Software Engineer

March, 2017 - May, 2019

Fidelity Investments

- Responsible for upgrading the code base to Angular UI and Back-end in JAVA Restful Services. Developing testable, reusable and maintainable components/services, integrating Restful API's.
- Responsible for the development of a Table Component Framework for eTax Application, which made a rendering of dynamic content customizable, focusing on its stability. It was reused across Multiple teams as well.
- Implemented Lazy-Loading, leading to an 85% reduction in web app loading time.
- Identified and suggested new technologies and tools for enhancing product value

Project Engineer

Sept, 2014 - Feb, 2017

Wipro Technologies

Bluedart Website Revamp

- Key Contributor in development and implementation of an appropriate design pattern.
- Development of SOAP-based Web Services (bottom-up) which internally consumes various third-party vendors and also calls Oracle stored procedures.
- Google Map API Integration with shortest path implementation
- Worked on Module end to end (UI layer using LiferayAUI, Controllers and Client Stub using axis2 implementation)
