SUBHRANSU KUMAR MAHARANA

Fidelity Investments, Bangalore, Karnataka, India

+91-9886326216 | subhransumaharana@gmail.com | https://subhset.github.io

An Experienced Java Developer with four years of experience in the retail and finance industries. Always keen to learn new technologies, Following **best Quality Practices** by applying **Design Patterns** , on **time Delivery** and looking to take more leadership over project delivery.

TECHNICAL SKILLS

Languages	Proficient in **Java**, Knows **Golang**, JavaScript/JQuery (prior experience)
Framework	**Spring** Framework (Core and MVC), Hibernate, Struts 2.x, Liferay Portal Framework
Web Technologies	J2EE, Web Services-SOAP, RESTful, Axis2, CXF, JSON, JDBC, Servlets, Portlets, JSP, GoogleAPI
Databases	Oracle, MySQL, SQLite
Client-Side Technologies	Highly Proficient in using **Angular4**, Angular2, HTML, CSS, JavaScript and JQuery
Web Servers	Tomcat Server, JBoss Server
Version Control Systems	GIT, TFS, SVN
Tool	SOAP-UI, Jenkins, Build tools - Maven, Ant
Cloud Technologies	Knowledge in AWS
IDE	Rich development experience with **eclipse**,**IntelliJ IDEA**, **Visual Studio**

- Sound Knowledge of Object-Oriented Programming Principles, Data Structures, Algorithms and Design Patterns.
- Deep understanding of building scalable Web Applications using cutting-edge Web Technologies.

WORK EXPERIENCE

- 4 Years of Experience and currently working as a *Software Engineer* at **Fidelity Investments**, Bangalore.

Project	Fidelity Investments: ETAX APPLICATION REVAMP (March-2017 to till date)
Customer	Fidelity Investments
Role	Full-stack Developer
Skills	**JAVA-J2EE, Angular4**, Typescript, **Restful** Services, **Spring** MVC,JavaScript, Oracle,Tomcat 7
Responsibilities	• Upgrading the code-base to Angular UI and Back-end in Restful Services • Developing reusable and maintainable components/services, integrating Restful API's. • We built a Table component framework for eTax Application and I worked on developing the UI components focusing on its stability ,which made rendering of dynamic content customizable. Now,Other teams across BU uses this framework . • Implemented **Lazy-Loading**, leading to 85% reduction in web app loading time. • Developed and Integrated **RESTful API's** into services through GET, POST, calls • Enhanced development speed by creating and reusing generic base components, directives,pipes and various utilities. • Identified and suggested new technologies and tools for enhancing product value. • Participated in daily scrum, sprint planning, sprint review meetings. • Mentored several developers and teams.

Project	Wipro Technologies: BLUEDART WEBSITE REVAMP (April-2016 to February - 2017)
Customer	Blue Dart Express Limited
Role	Full Stack Developer
Skills	Web Services (SOAP- bottom-up), **RESTful**, **Spring MVC**, Hibernate, JAVA-J2EE, Google Map API, Liferay Portal Framework, JavaScript, Oracle, Tomcat 7
Responsibilities	• Development of **SOAP-based Web Services** (bottom-up) which internally consumes various third-party vendors and also calls Oracle stored procedures. • **Google Map API Integration** with shortest path implementation • Worked on Module end to end (UI layer using **LiferayAUI**, Controllers and Client Stub

	using axis2 implementation)
Description	• Shipment application which possesses the operations of domestic and international courier services. • Handle end to end process starting from initiating a courier order, pickup, and delivery. • Provide customer features like finding nearby service station for pickup and delivery (integration with Google API), Transit time, scheduling a pickup, booking a shipment and Track a shipment.

Project	**Wipro Technologies: Haryana Excise Record Management System (Oct 2015 – Mar 2016)**
Customer	Haryana Government
Role	Full Stack Developer
Skills	Spring MVC, Hibernate, Core JAVA, JAVA-J2EE, JavaScript, Oracle, Tomcat 7
Responsibilities	• Was a key member in the development and implementing an appropriate design pattern • Participate in project planning sessions and interact with business analyst to analyze requirements.
Description	• The purpose of this project was to provide a system at district offices to Capture, Classify, Maintain and Archive the dealers related records submitted at Front Windows. This allows a custodian to initiate a new record to the Server File System and assign the file to different custodian within the headquarters for verification.

EDUCATION

Qualification	Board/University	Year	Percentage
B.Tech (Computer Science and Engineering)	Veer Surendra Sai University of Technology, Burla, Odisha	2010-2014	7.49/10
12th Std.	Khallikote Junior College, Brahmapur, Odisha	2010	76.16 %
High School	D.A.V Public School, Brahmapur, Odisha	2008	80.8 %

CO/EXTRA-CURRICULAR ACTIVITIES

- *Received **"On the Spot Award"*** - Award for my efforts in eTax Application, 2017.
- *Received **"Individual Award"*** - Award for solving complex framework defects in eTax Application, 2018.
- Programming in **Golang** (Udemy Course Certificate)
- AWS Solutions Architect Associate (Udemy Course Certificate)
- 1st Prize in the University coding fest in 2014.
- Worked as a Freelance Graphics Designer and Web developer in *freelancer.in* and *99designs.com*
- *Loves to play Guitar and do painting.*

STRENGTH

- Ability to work independently, and analyze issues.
- Very quick studying of new technologies, methods, and approaches.
- Strongly determined, ability to do hard work and meet deadlines.
- Strong Analytics and Good Decision-making skills.
- Ability to teach-instruct-train others.

DECLARATION

I do hereby declare that the above information is true to the best of my knowledge**.**
